

# Tri-flash kit Ø 130 with 30 LEDs • 2 batteries case power supply REF : 15702

*«* This is a safety device designed to increase visibility in a construction site area. Equipped with three Ø130 mm optics / 30 LEDs, these warning and marking lights make it possible to effectively signal interventions in progress on the sides of traffic lanes.

A three-position switch, located on the housing, associated with a day/night cell, allows you to choose between stopping the system, continuous operation or automatic triggering at nightfall. »

- Very low power consumption.
- 3-position switch: OFF / 24-24h / Night trigger.
- Ø 130 optics with 30 LEDs protected by a polycarbonate lens.

### Trafic Technologie Système

**ROADWORKS** SIGNALING

Range: Sign Lighting Equipments

# Tri-flash kit Ø 130 with 30 LEDs • 2 batteries case power supply **REF: 15702**

#### New generation optics:

Ultra-thin with only 25 mm thickness, it is nonetheless resistant since it is protected by a polycarbonate lens as well as a black ABS body. It does not fear the construction site. Its size fits perfectly into the body of a police panel. Once in place, nothing protrudes.

#### Efficient technology:

Thanks to LED technology selected to have the best intensity/consumption efficiency and a management box allowing its light power to be adapted according to the ambient lighting, this triflash kit consumes 2 to 3 times less than the others while being much brighter.

#### Easy connection:

With its jack-type RC (rapid connect) connector, connecting or changing the optics requires no tools, just like replacing the batteries.

# **TECHNICAL INFORMATIONS**

Operating mode	3 modes: OFF / H24 / Night trigger Double flash
Power supply	Two 6 V type 4R25 saline or alkaline batteries (not supplied).
Autonomy	1 329 hours with 2 batteries 45 Ah - 40 mA
Protection	Optics : IP 67. Housing : IP 53.
Size (L x l x h)	Optic : 142 x 84 x 142 mm – Housing : 195 x 184 x 82 mm
Weight	1,52 Kg
